### PERSONAL PROFILE

I became interested in software development as a career when I wanted to improve and create better, more user-friendly applications. My passion led me to teach myself the foundations of programming through free, online content.

I knew from the start this was the right career for me. The balance of teamwork and logical, problem-solving components are everything I have looked for in a career. I truly love being a developer!

I bring an enthusiastic, determined, people-friendly, and amenable personality to any team.

### TECHNICAL SKILLS

- Javascript, React.js
- C#/.NET Core
- ASP.NET Core
- T-SQL
- Html, Css, Sass, Material Ui, Bootstrap, Reactstrap
- Git and Github
- Postman
- Figma and LucidCharts

### PERSONAL ACHIEVEMENTS

- Voted MVP Teammate at Nashville Software School
- Employee of The Month at Graybar December 2019
- 3 times Nominated for Music city hitmakers-(hospitality award)
- Eagle Scout- Boy scouts of america

### TECHNICAL EXPERIENCE

#### **NASHVILLE SOFTWARE SCHOOL**

***Software Developer*** | June 2020 - present

##### ***INTENSIVE PART-TIME FULL-STACK DEVELOPMENT BOOTCAMP***

- Fundamentals such as Html, CSS, modular components, Version Control, database structure, and using ERDs
- Created dynamic single page applications using Javascript, React.js and C#/.NET Core
- Used Github to work in teams and create project boards, issue tickets, review code and make pull requests
- Worked in teams to problem solve and build fully functional web applications

### PROJECTS

#### **THE ADVENTURE LOGBOOK - INDIVIDUAL PROJECT**

- Built for rock climbers to easily and efficiently find the best and most classic rock climbs in any area
- Users can search, add to their to-do list, log any climb, and view extensive details on each
- Used 4 APIs including Google Maps API, Mountain Project API, Open Weather API, And a back end of Google Firebase.
- Shows ability to collect user data and manipulate data from external APIs
- Full CRUD functionality

[Visit Site Here](#) [View Code Here](#)

#### **RENAISSANCE FAIR DASHBOARD - GROUP PROJECT**

- Built a website for a renaissance fair with inventory for food, events, souvenirs, and shows
- My job was to build out the forms to add any shows, food or staff to events created by authenticated users and store the data
- We interacted with a real-time database on Google Firebase using complex data structures and intermediary tables
- Used Lucid charts to display costs of all the events and each item individually
